

Grease from the **PAN**...

Keep your pipes running free!

Cool down your cooking oil, grease, and fat and **pour** them **into a can** **NOT** down the drain.

Cooking oils, grease, and fat are great for frying and coating pots and pans but, they also **clog drain pipes** and cause **sewer pipes to back up!**

Also, please **wipe out** pots and pans with a **paper towel** before doing dishes- you will use less soap and decrease clogs.

to the **CAN!**
