

WATER MAIN FLUSH

To ensure that the highest quality water possible is delivered to our customers, the City of Santa Paula performs an annual water main flushing program.

Your water service should not be interrupted when the mains are flushed, but there may be less water pressure than normal. There is also a possibility that the water may be discolored for a short time in the zone being flushed and possibly in adjacent zones. This is a temporary condition and not a health risk. Before doing any projects that may suffer from discolored water, run your cold water to make sure it is running clear. If you develop a problem with a rusty color on laundry items, stain remover is available from the Water Division at no cost. If you have further questions, please contact the Water Division at (805) 933-4282.
