# **PHASE I ENVIRONMENTAL SITE ASSESSMENT**

**1226 Ojai Road  
APN: 100-0-040-015  
Santa Paula, California 93060**

## **1.0 INTRODUCTION**

### **1.1 Purpose**

This report presents the results of a Phase I Environmental Site Assessment conducted for 1226 Ojai Road, APN: 100-0-040-015 in the City of Santa Paula and County of Ventura, California. See Figure 1 for a Site Location Map.

The report details the results of an investigation into previous and current land use to identify potential environmental concerns as revealed by a records review, a site reconnaissance, and interviews with regulatory agency officials and individuals associated with the site. This report has been prepared for Mr. Scott Smith of Williams Homes for the purpose of assessing potential environmental liabilities associated with the property.

### **1.2 Scope of Assessment**

This assessment was conducted in accordance with the EEG Services (EEG) proposal dated November 6, 2013. The scope of this project conforms to the ASTM Practice E 1527-05. EEG performed the following services as part of this assessment:

#### **1.2.1 Site Reconnaissance**

A site reconnaissance of the property was conducted by an EEG representative on November 12, 2013. The purpose of the visit was to observe site conditions and look for evidence of hazardous materials storage and usage, obvious signs of contamination, hazardous waste generation, waste disposal activity, and similar environmental concerns. Color photographs of the site were taken during the site reconnaissance and appear in Appendix 1.

#### **1.2.2 Records Review**

A review of selected records and information was conducted to identify environmental concerns associated with past land use and operations conducted on the site. Included in the background investigation was a review of the following sources:

**Regulatory Agencies Contacted:**

- City of Santa Paula Departments of Planning and Building and Safety
- County of Ventura Environmental Health Division

**Other Sources of Information:**

- Environmental Data Resources provided aerial photographs.
- Division of Oil and Gas Maps (Online).
- The USGS - 7.5 Minute Series Topographic Map (Santa Paula and Santa Paula Peak, CA Quadrangles).
- Geologic Map of the Santa Paul Peak Quadrangle, Ventura County, California, by Thomas W. Dibblee, Jr., 1990, Edited by Helmut E. Ehrenspeck, 1990, Edited by John A. Minch, 2010.
- California Department of Water Resources, Bulletin 104 and Bulletin 118.
- California Geological Survey; Seismic Hazard Zone Report 061, Seismic Hazard Zone Report for the Santa Paula 7.5 Minute Quadrangle, Ventura County, California, 1997
- California Geological Survey; Seismic Hazard Zone Report 075, Seismic Hazard Zone Report for the Santa Paula Peak 7.5 Minute Quadrangle, Ventura County, California, 2003.
- EDR Sanborn, Inc. reviewed their historic map collection for coverage of the site.
- Regulatory agency databases were reviewed by Environmental Data Resources, Inc. (EDR) for listed properties located within a one-mile radius of the site. The EDR database search included a review of lists compiled by various federal, state, and local agencies. See Appendix 2 for a copy of the EDR database report.

## **2.0 SITE AND AREA DESCRIPTION**

### **2.1 Environmental Setting**

#### **2.1.1 Geologic and Geographic Setting**

The subject property is located within the central Ventura Basin of the Transverse Ranges Geomorphic Province of California, which is characterized by east-west trending valleys and ridges. The project is located west of Santa Paula Creek between the southern slopes of Sulphur Mountain and Santa Paula Ridge. Earth materials at the site consist of Quaternary-age alluvium derived from the Quaternary-age Saugus Formation, Pico Formation, and Los Posas Sand.

#### **2.1.2 Hydrogeology**

The site is underlain by the Santa Clara River Valley Basin, Santa Paula Subbasin, whose primary water-bearing units are Quaternary-age alluvium and the San Pedro Formation. Groundwater is generally unconfined in the eastern portion of the basin with localized confinement in the western portion where finer grained sediments are more extensive.

#### **2.1.3 Topography**

The eastern half of the property is relatively flat-lying with a gentle slope the southeast. The

western half of the site slopes sharply from an of approximately 465 feet above mean sea level (msl) to approximately 600 feet msl. Surface drainage appears to be by sheet flow to the southeast and toward a ravine that runs along the southern boundary of the property.

#### **2.1.4 Groundwater Depth**

The historic high groundwater at the site is shown to be greater than forty feet below ground surface by the California Geological Survey, Seismic Hazard Zone Reports for the Santa Paula and Santa Paula Peak 7.5 Minute Quadrangles, Ventura, California.

#### **2.1.5 Groundwater Gradient**

Based on review of the topographic map, groundwater is expected to migrate in a southerly to southeasterly direction in the immediate vicinity of the site.

#### **2.1.6 Regional Impairments to Groundwater**

The Department of Water Resources Bulletin 118 indicates that groundwater in the basin has relatively high TDS (870-3,010 mg/L) and electrical conductivity ranges from 1230 to 2860 µmho. Groundwater may be impacted by volatile organic compounds locally due to industrial or retail gasoline releases.

#### **2.1.7 Beneficial Uses**

The Water Quality Control Plan (Basin Plan) for the Los Angeles Region (CRWQCB-LAR 1994) indicates that groundwater in the Santa Paula Subbasin has existing municipal, industrial, process and agricultural beneficial uses.

### **2.2 Site Information**

#### **2.2.1 Site Location**

The subject site is located on 1226 Ojai Road (California Highway 150) in the City of Santa Paula.

#### **2.2.2 Current Site Use**

The approximate southeast quarter of the site is developed with a residence (County Historical Landmark dating back to 1884), and associated outbuildings. The outbuildings are two caretakers residences and a bar. The barn has been condemned by the City of Santa Paula. The remainder of the property is vacant. The residence is unoccupied and the only activity onsite is the boarding and care of a few horses, a mule and a donkey. The residence was partially renovated approximately one year ago, but the outbuildings remain in their original condition.

#### **2.2.3 Assessor's Parcel Number and Legal Description**

The assessor's parcel number 100-0-040-015.

## **2.2.4 Property Type (Zoning)**

The property type is zoned Hillside Residential 2-PD (0-3 du/ac).

## **2.2.5 Utilities**

The property will be serviced by utilities as follows:

Sewer: Currently on septic.  
Natural Gas: Southern California Gas  
Water: City of Santa Paula  
Electric: Southern California Electric

## **2.3 Site Reconnaissance**

The following was noted during the November 12, 2013 site reconnaissance:

### **2.3.1 Hazardous Materials Storage and Use**

Small quantities of hazardous and potentially hazardous materials and waste were noted in and around each of the outbuildings. The largest item noted was a fifty-five gallon drum of diesel. Several upright smudge pots were also observed, but not checked for contents. A few pieces of farm machinery (tractors, etc.) were noted in yard areas that may contain fuel and oil. Inside the barn, a number of gas cans, unlabeled cans were observed along with a five-gallon bucket containing what appeared to be waste oil.

### **2.3.2 Hazardous Waste Generation, Storage & Disposal**

Nothing was observed to indicate the generation, storage or disposal of hazardous waste at the site, except as noted above.

### **2.3.3 Aboveground Storage Tanks**

A trailer-mounted storage tank used to fill smudge pots is present onsite.

### **2.3.4 Underground Storage Tanks**

No indications of underground storage tanks (USTs) were observed.

### **2.3.5 Suspect Fill Connections and Vents**

A number of vents, pipes, and drains were noted, whose purpose was not readily apparent.

### **2.3.6 Unidentified Cover Plates, Pipes, Drains, etc.**

As above.

### **2.3.7 Sumps, Pits, Clarifiers, etc.**

No sumps, pits, or clarifiers were observed.

### **2.3.8 Waste or Trash Piles**

No significant waste or trash piles were observed.

### **2.3.9 On Site Landfills**

None observed.

### **2.3.10 Disturbed Surface Areas**

The eastern portion of the property has been used for raising livestock, and cultivated for citrus production. The surface is disturbed across the entire area. No surface disturbance was noted on the upslope, western portion of the site, except for an access road that traverses the hillside.

### **2.3.11 Discolored Soil, Asphalt, etc.**

None observed.

### **2.3.12 Distressed Vegetation Areas**

No distressed vegetation was observed.

### **2.1.13 Fill Material Used**

No fill materials were identified onsite.

### **2.1.14 Onsite Wells**

No onsite wells were observed.

### **2.1.15 High Power Transmission Lines**

Power transmission lines traverse the southern boundary of the property. It was not readily apparent whether the power lines exist in an easement on the property or are offsite.

### **2.1.16 PCBs/Electrical Transformers**

Transformers were observed on power poles associated with the transmission lines along the southern boundary.

### **2.1.17 Asbestos and Lead-based Paint**

There is likely asbestos and lead-based paint present in each of the structures on site. The condemned barn has posted signs warning of the presence of lead.

## **2.4 Survey of Surrounding Properties**

The following table identifies the surrounding land use in all directions (Figure 2):

**Table 2.4-1 Surrounding Land Use**

<b>DIRECTION</b>	<b>ADJACENT LAND USE</b>	<b>CONCERNS</b>
------------------	--------------------------	-----------------

North	Residential	None noted.
South	Residential	None noted.
East	Residential	None noted.
West	Open space	None noted.

### 3.0 RECORDS REVIEW

#### 3.1 Historical Records Review

##### 3.1.1 Topographic Map Review

The USGS 7.5 Minute Series Topographic Quadrangle, Santa Paula and adjacent Santa Paula Peak, California were reviewed. The Santa Paula quadrangle is dated 1967 and was photo-revised from 1951. The map shows the subject property and surrounding area as mixed use agricultural and residential. The subject property has three structures on the eastern portion of the property. The remainder of the eastern portion appears to be cultivated as orchards. The western portion of the site is undeveloped.

Historical Topographic maps dating back to 1903 indicate the property was first cultivated between 1941 and 1951, and that little else has changed on the property since its first development in 1884 (other sources). See Figure 1a for a copy of the Topographic Map.

##### 3.1.2 Sanborn Map Review

Sanborn Maps were available for the years 1929, 1950, and 1953. The maps show the property to be occupied by three dwellings (caretaker's residence and garage) and an outbuilding (barn). The Certified Sanborn Report is included in the EDR report in Appendix 2.

##### 3.1.3 Aerial Photo Review

EDR provided aerial photographs of the site and surrounding areas covering the years 1938, 1947, 1959, 1964, 1975, 1989, 1994, 2005, 2009, and 2010. These photos were studied for evidence of previous land use, signs of contamination, hazardous materials storage, and other concerns. The following table summarizes the review:

**Table 3.1-2 Aerial Photo Review**

DATE FLIGHT SCALE	SUBJECT SITE LAND USE	SURROUNDING LAND USE	OBVIOUS CONCERNS
1938 Laval 1"=500'	Property is cultivated with orchards and the southeast corner is occupied with four structures.	Mostly orchards and open space with residential to the southeast.	None noted.
1947 Tubis 1"=555'	No significant change from previous photograph.	No significant change from previous photograph.	None noted.
1959 Robinson 1"=500"	No significant change from previous photograph.	Increased residential to the north and a subdivision appears to the east.	None noted.

1964 Mark Hurd 1"=500'	No significant change from previous photograph.	No significant change from previous photograph.	None noted
1975 AMI 1"=500'	No significant change from previous photograph.	No significant change from previous photograph. Vegetation has matured in subdivision to the east.	None noted
1989 USGS 1"=500'	Orchards have been removed, otherwise little change from previous.	No significant change from previous photograph.	None noted
1994 EDR 1"=500'	No significant change from previous photograph.	No significant change from previous photograph.	None noted
2005 EDR 1"=500'	No significant change from previous photograph.	No significant change from previous photograph.	None noted
2009 EDR 1"=500'	No significant change from previous photograph.	No significant change from previous photograph.	None noted
2010 EDR 1"=500"	No significant change from previous photograph.	No significant change from previous photograph.	None noted
2012 EDR 1"=500'	No significant change from previous photo.	No significant change from previous photo.	None noted

### 3.1.4 Division of Oil, Gas, and Geothermal Resources

The DOGGR Online Mapping System (DOMS) had no listing of oil wells on the subject property. A printout of the DOGGR search result is included in Appendix 3.

### 3.1.5 City Directories

The directories listed J.N. Procter from 1930 through 1970 for the subject property. No concerns were noted on site or in the surrounding area. The City Directory Report is included in the EDR report in Appendix 2.

### 3.1.6 Previous Assessments

No previous assessment of the property was available for review or identified through this assessment.

## 3.2 Interviews

EEG interviewed Mr. Scott Rushing (Broker) and Mr. John Procter (descendent of original owner of the property). Mr. Rushing, who is a lifetime resident of Santa Paula and friend of the Procter family, provided access to the property and was present during the site walk. He was not aware of any underground tanks having been used at the site. Mr. Rushing also indicated that citrus cultivation was discontinued as long as thirty years ago (early to mid-1980's), possibly coinciding with a dispute with the local water company, and was more of a gentleman farmer type operation than a serious commercial enterprise. Raising livestock was always a focus on

the property and it continues today. Mr. Rushing noted cooperation with the County Sherriff's Department on various equestrian events. The property has always been and continues to be on septic.

Mr. Procter was not aware of any underground storage tanks on the property and indicated the boiler/heater observed during the site walk was either coal or wood fired. He acknowledged the presence of smudge pots and a trailer-mounted tank used to fill them onsite. He also conceded the potential for small quantities of hazardous materials that may be significant in the aggregate to be present in and around the outbuildings, particularly the barn, and agreed that inventory and removal by trained personnel was appropriate.

### **3.3 Regulatory Agency Records Review**

The following regulatory agencies were contacted regarding file materials for the subject site. Our findings are summarized below.

#### **3.3.1 County of Ventura Environmental Health Division**

The County of Ventura Environmental Health Division (EHD) had no listings for the subject site. See Appendix 3 for printout from the County website.

#### **3.3.2 State of California Geotracker Database**

Geotracker had no listing for the subject property. A printout of the Geotracker search results is included in Appendix 3.

#### **3.3.3 State of California Envirostor Database**

The Envirostor database had no listing for the subject property. A printout of the Envirostor search results is included in Appendix 3.

### **3.4 Regulatory Agency Database Review**

Regulatory agency databases were reviewed by Environmental Data Resources (EDR). These databases include lists of contaminated sites or sites under assessment for contamination, as well as other compilation lists. The complete EDR database report appears in Appendix 2. This report includes a radius map of listed sites located within the specified search radius of the subject site. The table below shows the databases reviewed and the minimum search radius covered by the EDR report.

**Table 3.4-3 Database Search Radius**

<b>DATABASE</b>	<b>MINIMUM SEARCH DISTANCE (in miles)</b>
National Priorities List ( <b>NPL</b> )	1.0
Comprehensive Environmental Response, Compensation and Liability Information System ( <b>CERCLIS</b> )	0.5

### 3.4.1 Subject Site

The subject site was not listed in any of the databases. The radius map indicates a former underground fuel tank assessment on the subject property, however, the listing is in error and the site is actually in Ojai.

### 3.4.2 Surrounding Sites

Surrounding listed sites with contamination problems that pose a significant threat to the subject site would be those sites that:

- Are located immediately adjacent to the subject site.
- Have a known or potential groundwater contamination problem and are located up gradient and near the subject site.
- By their size or nature pose a threat to the entire area (i.e., landfills, Superfund sites, etc.).

The following table lists the total number of sites found within the previously identified search radius, with the potentially significant sites listed based on the above criteria.

**Table 3.4-4 Summary of Listed Surrounding Sites**

DATABASE	TOTAL SITES IDENTIFIED	POTENTIALLY SIGNIFICANT LISTED SITES
NPL	0	None.
CERCLIS	0	None
ERNS	0	None.

RCRIS CORRACTS	0	None.
RCRIS TSDF	0	None.
RCRIS LQG/SQG	0/0	None.
HAZNET	0	None
AWP	0	None.
CALSITES	0	None.
CORTESE	0	None.
State Landfill	0	None.
SWAT	0	None.
LUST	0	None.
SLIC	0	None.
SWEEPS	0	None.
CA FID UST	0	None
EDR Historical Cleaners	0	None.

**Summary of Concerns from Potentially Significant Listed Sites:** The potentially significant listed sites are situated in the site vicinity, but not immediately adjacent to the subject site. The sites are listed as being in the pollution characterization phase and/or remedial action. Potential impacts to the subject site would be limited to the migration of contaminants in groundwater.

#### **4.0 FINDINGS**

##### **4.1 Historical Conditions**

The research conducted for this assessment, which dated back to 1884, indicates that residential construction on the property was completed for Wallace L. Hardison, a pioneer of local oil, mining, and agricultural interests in 1884. Additional structures were added in the southeast corner of the property in the following years, which included caretaker's residences and a barn, livestock has been raised and boarded in this area of the property continuously since. Citrus orchards were cultivated on the rest of the eastern portion of the site and on about one-third of the upslope western portion dating back to at least the mid-1930s. Based on aerial photographic review and the interviews conducted, citrus cultivation was discontinued in the mid-1980s. No other land use was identified.

##### **4.2 Current Conditions**

The main residence has been designated Ventura County Historical Landmark #35, and has recently undergone a \$400,000 renovation (Scott Rushing). The residence is currently vacant. The barn has been structurally condemned by the City of Santa Paula, but remains filled with equestrian tack, grooming supplies and food supplements, equipment, tools, carriages, etc. Small quantities of potential hazardous materials (gasoline cans, unlabeled containers, smudge pots, etc.) and waste (bucket of potential waste oil, unlabeled containers, fuel tanks and reservoirs on farm implements, etc.). Livestock continues to be boarded at the site and ranch vehicles (tracks and trailers) are being stored on site, along with apparently disabled farm implements. Irrigation standpipes are visible in the former orchard area and tile drains or piping

likely remains in place.

#### **4.3 Data Gaps and Activity or Use Limitations**

There are no significant data gaps for this assessment. No activity or use limitations were identified.

### **5.0 CONCLUSIONS AND RECOMMENDATIONS**

We have performed a Phase I Environmental Site Assessment of 1226 Ojai Road, APN # 100-0-040-015 in the City of Santa Paula and County of Ventura, California in general accordance with the ASTM Practice E 1527-05. Any exceptions to, or deletions from, the proposed Scope of Work were previously described in this report where applicable. This assessment encountered no evidence of recognized environmental conditions (RECs) associated with the subject site, except the following.

#### **5.1 Historical Recognized Environmental Conditions**

Agricultural cultivation is typically considered a recognized environmental condition (REC), based on the potential application of persistent pesticides such as DDT and Toxaphene. However, cultivation appears to have been discontinued around 30 years ago and based on the interviews conducted, was not a serious commercial enterprise that would have warranted the expense of routine pesticide application. No fixed mixing and storage area was identified on site, but would probably have been located in the vicinity of the barn if one existed. The application, mixing, and storage of pesticides cannot be ruled out, but it does not appear to have occurred on large-scale, routine basis. Furthermore, DDT and Toxaphene have half-lives between 2 and 15 years and is 97% gone within 5 half-lives. Given the warm and dry climate of the project site, the half-lives would be on the lower end of the range and the compounds would be gone in 10 to 20 years.

**Recommendation:** EEG Services has no recommendations for further assessment of environmental conditions related agricultural cultivation.

#### **5.2 Recognized Environmental Conditions**

The presence of potential hazardous waste and materials on site is considered a REC, largely due to the age, nature, and continuous operation of the property. A detailed inventory of potential hazardous materials and wastes was beyond the scope and time constraints of this assessment.

**Recommendation:** EEG Services recommends that prior to any demolition or development activity at the site, a detailed inventory of potential hazardous materials and waste be prepared by trained personnel, and the materials/waste be shipped offsite to an appropriate facility by a licensed hazardous waste contractor. There was no indication of significant soil contamination (staining, odors, etc.) noted during the site walk. However, if stained and odored soils are encountered during demolition or grading operations, they should be characterized by a qualified person and removed from the site in an appropriate manner.

## **6.0 ENVIRONMENTAL PROFESSIONAL CERTIFICATION**

I, Peter Thams, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

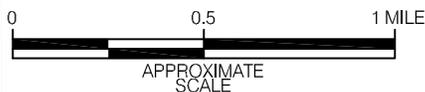

## **7.0 QUALITY AND LIMITATIONS STATEMENT**

This report has been prepared for the exclusive use of Williams Homes as it pertains to 1226 Ojai Road, APN # 100-0-040-015 in the City of Santa Paula and County of Ventura, California. Any use of this report and supporting data, by a party other than specifically named above, shall be solely at the risk of such third party.

All interpretations made by EEG Services are opinions based on evaluation of the research information collected and visual assessment of the location. These procedures have limitations, and as such, it should not be construed that all possible site conditions were identified. It should be recognized that there is no guarantee this study has covered all possible environmental issues at the site. In performing our professional services, we have applied present professional and scientific judgment and used a level of effort consistent with the standard practice measured on the date of this report and in the locale of the project site for similar type studies.

## **Color Photographs of Site Reconnaissance**

## Hardison House

1. Main entrance to property.

## Hardison House

2. Entrance to property at southeast corner, looking west.

## Hardison House

3. View of barn (condemned by Building and Safety) and paddock area.

## Hardison House

4. Looking northwest toward Hardison House.

## Hardison House

5. Looking north along Ojai Road. Red barn at left center of photo is offsite, chain link fence is the approximate property line

## Hardison House

6. Looking west from northeastern portion of property.

## Hardison House

7. Looking northwest from central portion of property. Row of irrigation standpipes visible in central portion of photo.

## **Hardison House**

8. Looking southwest from central portion of the site. Property extends upslope and over the ridge. Upslope area has historically been undeveloped.

## Hardison House

9. View of corral area in southeastern portion of site. Note smudge pots and drum of diesel.

## Hardison House

10. Smudge Pots. No visible staining.

## Hardison House

11. Rear side of barn, looking east.

## Hardison House

12. Rear side of barn, looking southerly.

## Hardison House

13. View of interior of barn and typical condition. Note gas can and unmarked container.

## Hardison House

14. Inside barn. Typical condition – appears to be waste oil.

## Hardison House

15. Hydrated glyceryl – not a hazardous material. Research indicates product is a hydrating supplement for work outs, etc.

## Hardison House

16. Boiler in basement of main residence – fuel source not identified during site walk.

## Hardison House

17. Farm implements.

## Hardison House

18. Vehicles and horse trailers in southeastern corral area.

## Hardison House

19. View of barn interior.

## Hardison House

20. Leather cleaning/conditioning supplies, etc. inside barn.

## **Appendix 2**

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

1226 OJAI ROAD  
SANTA PAULA, CA 93060

#### COORDINATES

Latitude (North): 34.3725000 - 34° 22' 21.00"  
Longitude (West): 119.0672000 - 119° 4' 1.92"  
Universal Transverse Mercator: Zone 11  
UTM X (Meters): 309916.5  
UTM Y (Meters): 3805200.0  
Elevation: 493 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 34119-C1 SANTA PAULA, CA

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

EDR MGP..... EDR Proprietary Manufactured Gas Plants

## EXECUTIVE SUMMARY

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal CERCLIS NFRAP site List***

CERC-NFRAP: Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

A review of the CERC-NFRAP list, as provided by EDR, and dated 04/26/2013 has revealed that there is 1 CERC-NFRAP site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
BAKER W P FACILITY	1006 AMBER DR	N 1/8 - 1/4 (0.216 mi.)	A7	12

#### ***State and tribal leaking storage tank lists***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, and dated 09/16/2013 has revealed that there is 1 LUST site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b><i>VENTURA CO FIRE PROT DIST #21</i></b> Status: Completed - Case Closed	<b><i>1201 OJAI AVE</i></b>	<b><i>E 0 - 1/8 (0.002 mi.)</i></b>	<b><i>1</i></b>	<b><i>8</i></b>

## EXECUTIVE SUMMARY

### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, and dated 09/16/2013 has revealed that there is 1 UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
W. PERRY BARKER	1006 AMBER DR	N 1/8 - 1/4 (0.216 mi.)	A5	11

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### ***Local Lists of Registered Storage Tanks***

HIST UST: Historical UST Registered Database.

A review of the HIST UST list, as provided by EDR, and dated 10/15/1990 has revealed that there is 1 HIST UST site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
PRIVATE HOME	1006 AMBER DR	N 1/8 - 1/4 (0.216 mi.)	A6	12

#### ***Other Ascertainable Records***

HIST CORTESE: The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSTATES]. This listing is no longer updated by the state agency.

A review of the HIST CORTESE list, as provided by EDR, and dated 04/01/2001 has revealed that there is 1 HIST CORTESE site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>VENTURA CO FIRE PROT DIST #21</b>	<b>1201 OJAI AVE</b>	<b>E 0 - 1/8 (0.002 mi.)</b>	<b>1</b>	<b>8</b>

### **EDR HIGH RISK HISTORICAL RECORDS**

#### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not

## EXECUTIVE SUMMARY

limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there is 1 EDR US Hist Auto Stat site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	1323 MARIPOSA DR	NE 0 - 1/8 (0.075 mi.)	3	11

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 2 EDR US Hist Cleaners sites within approximately 0.25 miles of the target property.

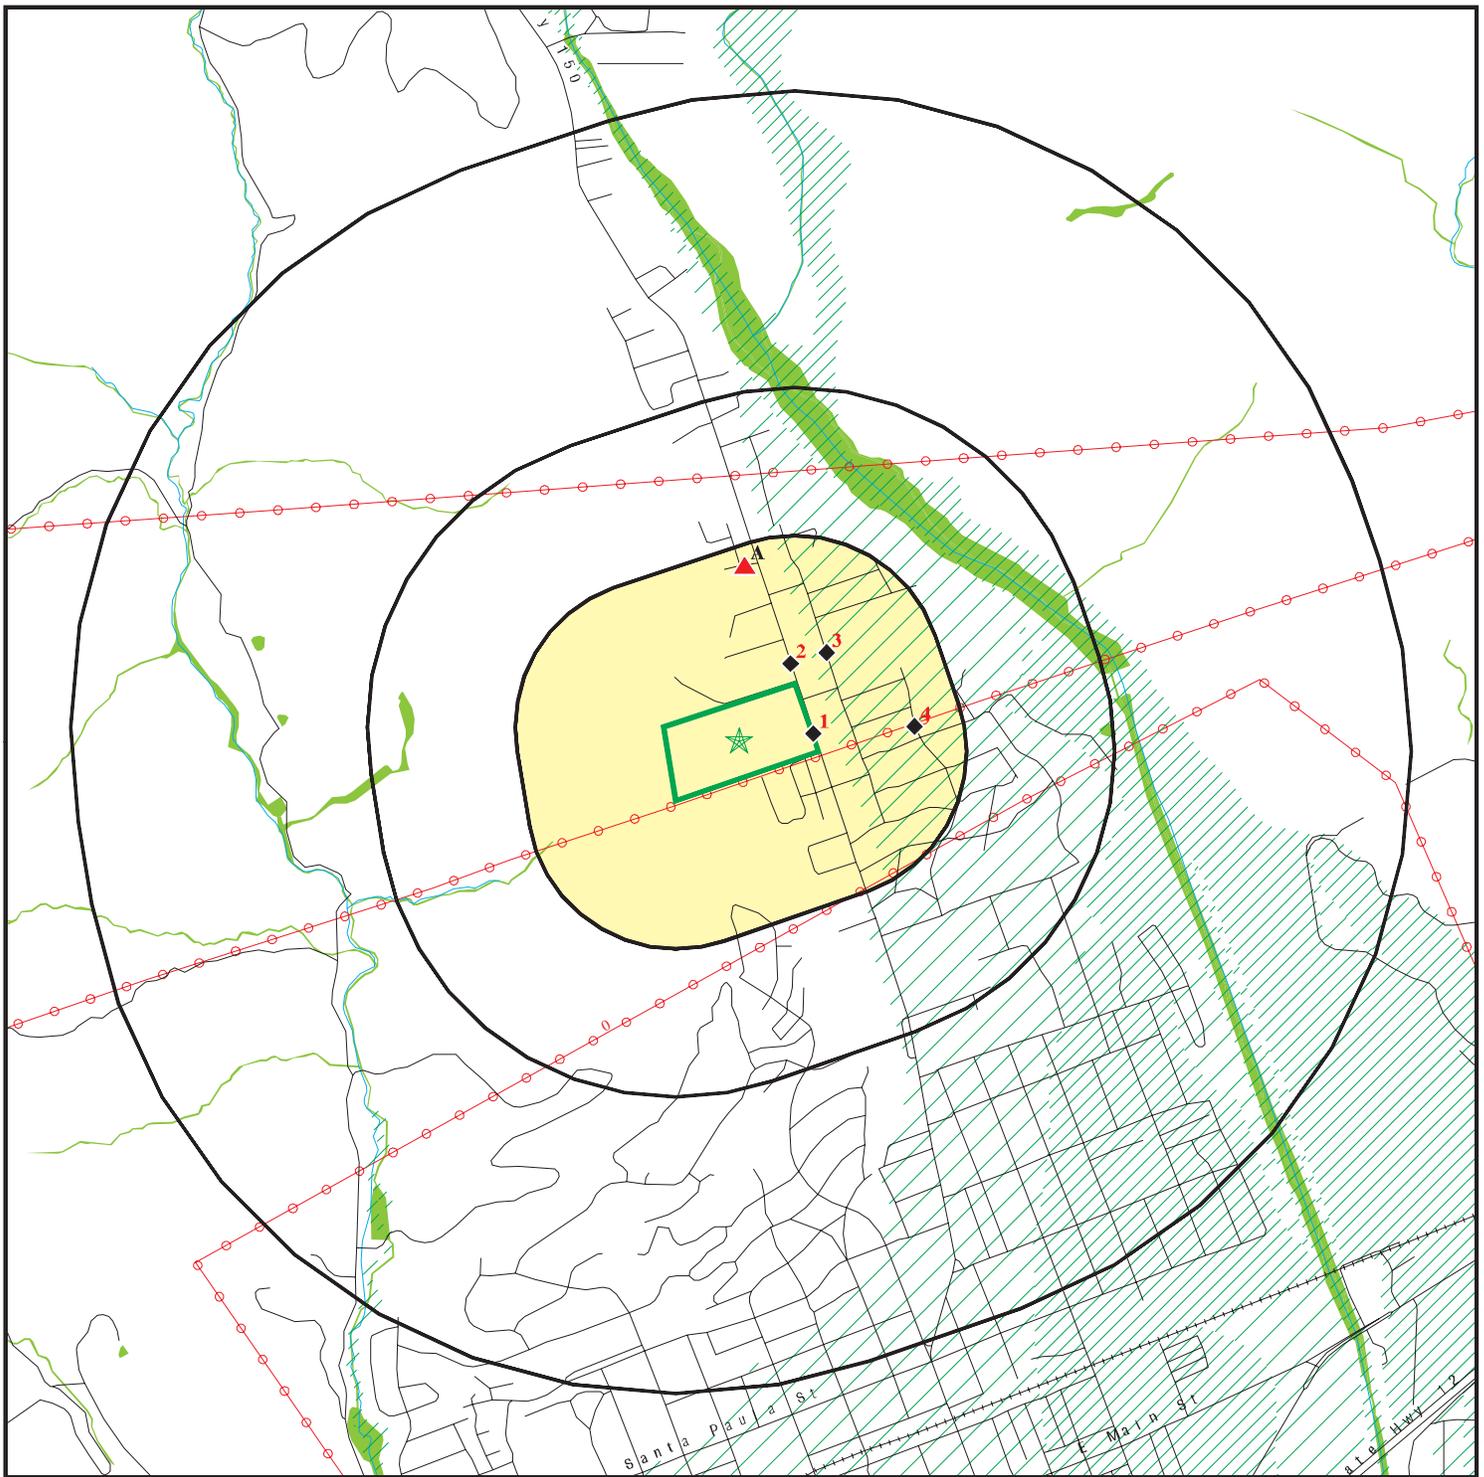

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 10/11/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 10/11/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

Number of Days to Update: 56	Next Scheduled EDR Contact: 11/28/2011
	Data Release Frequency: No Update Planned

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/09/2013	Telephone: N/A
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 10/11/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 10/18/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 12/09/2013
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/31/2012	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2012	Telephone: 703-603-8704
Date Made Active in Reports: 12/20/2012	Last EDR Contact: 10/11/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 04/26/2013	Source: EPA
Date Data Arrived at EDR: 05/29/2013	Telephone: 703-412-9810
Date Made Active in Reports: 08/09/2013	Last EDR Contact: 10/18/2013
Number of Days to Update: 72	Next Scheduled EDR Contact: 12/09/2013
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/11/2013  
Date Data Arrived at EDR: 08/08/2013  
Date Made Active in Reports: 09/13/2013  
Number of Days to Update: 36

Next Scheduled EDR Contact: 01/13/2014  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 07/11/2013  
Date Data Arrived at EDR: 08/08/2013  
Date Made Active in Reports: 09/13/2013

Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 07/11/2013  
Date Data Arrived at EDR: 08/08/2013

## ***Federal institutional controls / engineering controls registries***

### US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 09/10/2013
Number of Days to Update: 104	Next Scheduled EDR Contact: 12/23/2013
	Data Release Frequency: Varies

### US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 06/17/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/21/2013	Telephone: 703-603-0695
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 09/10/2013
Number of Days to Update: 104	Next Scheduled EDR Contact: 12/23/2013
	Data Release Frequency: Varies

### LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 08/20/2013	Source: Department of the Navy
Date Data Arrived at EDR: 08/23/2013	Telephone: 843-820-7326
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 08/15/2013
Number of Days to Update: 70	Next Scheduled EDR Contact: 09/02/2013
	Data Release Frequency: Varies

## ***Federal ERNS list***

### ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2012	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/17/2013	Telephone: 202-267-2180
Date Made Active in Reports: 02/15/2013	Last EDR Contact: 10/01/2013
Number of Days to Update: 29	Next Scheduled EDR Contact: 01/13/2014
	Data Release Frequency: Annually

## ***State- and tribal - equivalent NPL***

### RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity. These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 09/05/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/05/2013	Telephone: 916-323-3400
Date Made Active in Reports: 10/10/2013	Last EDR Contact: 11/06/2013
Number of Days to Update: 35	Next Scheduled EDR Contact: 02/17/2014
	Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 09/05/2013	Source: Department of Toxic Substances Control
Date Data Arrived at EDR: 09/05/2013	Telephone: 916-323-3400
Date Made Active in Reports: 10/10/2013	Last EDR Contact: 11/06/2013
Number of Days to Update: 35	Next Scheduled EDR Contact: 02/17/2014

	Data Release Frequency: Varies

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/24/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/25/2013	Telephone: 202-566-2777

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/11/2013

Date Made Active in Reports: 09/18/2012	Last EDR Contact: 11/06/2013
Number of Days to Update: 42	Next Scheduled EDR Contact: 02/17/2014
	Data Release Frequency: Varies

### DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 888-275-8747
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 10/18/2013
Number of Days to Update: 62	Next Scheduled EDR Contact: 01/27/2014
	Data Release Frequency: Semi-Annually

### FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2011	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 02/26/2013	Telephone: 202-528-4285
Date Made Active in Reports: 03/13/2013	Last EDR Contact: 09/10/2013
Number of Days to Update: 15	Next Scheduled EDR Contact: 12/23/2013
	Data Release Frequency: Varies

### CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Next Scheduled EDR Contact: 12/23/2013  
Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 09/14/2010

**HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 09/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2013	Telephone: 202-343-9775
Date Made Active in Reports: 11/01/2013	Last EDR Contact: 10/09/2013
Number of Days to Update: 23	Next Scheduled EDR Contact: 01/20/2014
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 03/08/2013	Source: EPA
Date Data Arrived at EDR: 03/21/2013	Telephone: (415) 947-8000
Date Made Active in Reports: 07/10/2013	Last EDR Contact: 09/11/2013
Number of Days to Update: 111	Next Scheduled EDR Contact: 12/23/2013
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 01/23/2013	Source: EPA

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### ***EDR Exclusive Records***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### Underground Storage Tank Comprehensive Facility Report

Underground storage tank sites located in Yolo county.

Date of Government Version: 06/24/2013	Source: Yolo County Department of Health
Date Data Arrived at EDR: 06/26/2013	Telephone: 530-666-8646
Date Made Active in Reports: 08/20/2013	Last EDR Contact: 09/23/2013
Number of Days to Update: 55	Next Scheduled EDR Contact: 01/08/2014
	Data Release Frequency: Annually

## YUBA COUNTY:

### CUPA Facility List

CUPA facility listing for Yuba County.

Date of Government Version: 08/01/2013	Source: Yuba County Environmental Health Department
Date Data Arrived at EDR: 08/05/2013	Telephone: 530-749-7523
Date Made Active in Reports: 08/22/2013	Last EDR Contact: 11/04/2013
Number of Days to Update: 17	Next Scheduled EDR Contact: 02/17/2014
	Data Release Frequency: Varies

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013	Source: Department of Energy & Environmental Protection
Date Data Arrived at EDR: 08/19/2013	Telephone: 860-424-3375
Date Made Active in Reports: 10/03/2013	Last EDR Contact: 08/19/2013
Number of Days to Update: 45	Next Scheduled EDR Contact: 12/02/2013
	Data Release Frequency: Annually

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2011  
Date Data Arrived at EDR: 07/19/2012

Next Scheduled EDR Contact: 12/30/2013  
Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

### Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM

### TARGET PROPERTY ADDRESS

HARDISON HOUSE  
1226 OJAI ROAD  
SANTA PAULA, CA 93060

### TARGET PROPERTY COORDINATES

Latitude (North):	34.3725 - 34° 22' 21.00"
Longitude (West):	119.0672 - 119° 4' 1.92"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	309916.5
UTM Y (Meters):	3805200.0
Elevation:	493 ft. above sea level

### USGS TOPOGRAPHIC MAP

Target Property Map:	34119-C1 SANTA PAULA, CA
Most Recent Revision:	1967
North Map:	34119-D1 SANTA PAULA PEAK, CA
Most Recent Revision:	1988

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

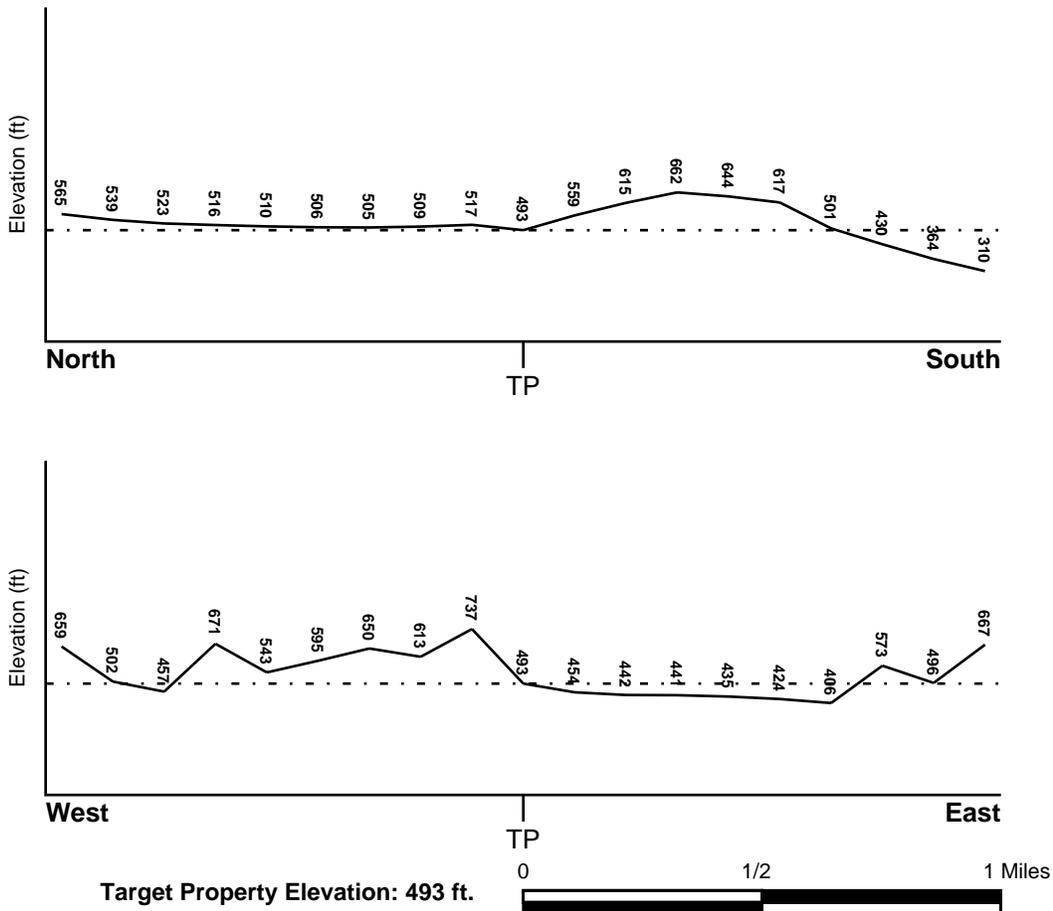

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
VENTURA, CA	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property: 06111C - FEMA DFIRM Flood data

Additional Panels in search area: Not Reported

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
SANTA PAULA	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SE
Site Name:	Associated Insectory
Site EPA ID Number:	CAD029423472
Groundwater Flow Direction:	Southwest
Inferred Depth to Water:	90 feet.
Hydraulic Connection:	A clay layer that is 5 feet to 30 feet thick underlies the site and is not believed to be continuous within a 3-mile radius of the site. (It is not clear if the clay layer is above or below the surficial aquifer.)
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u>	<u>GENERAL DIRECTION</u>
	<u>FROM TP</u>	<u>GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: CASTAIC

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	25 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 4 Min: 1.4	Max: 7.3 Min: 6.1
2	25 inches	29 inches	weathered bedrock	Not reported	Not reported	Max: Min:	Max: Min:

#### Soil Map ID: 2

Soil Component Name: GARRETSON

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	22 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay. FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 14 Min: 4	Max: 7.3 Min: 6.1
2	22 inches	59 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay	Max: 14 Min: 4	Max: 7.8 Min: 6.1

### Soil Map ID: 3

Soil Component Name: SAN BENITO

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1926 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

## Hardison (W.L.) House

Built 1884; Victorian style

1226 Ojai Rd; private

Ventura County Historical Landmark #35

Completed in 1884, this was the home of Wallace L. Hardison and his family. Mr. Hardison is remembered primarily for being a co-founder of both the Union Oil and the Limoneira Companies. However, when he built this house neither of these accomplishments had occurred! A businessman of many interests, he was, among other things, breeder of fine race horses and registered cattle, the President of the Santa Paula Horse and Cattle Company, a part owner of a profitable gold mine in Peru and the one-time owner of the Los Angeles Herald. The town's first telephone line was installed here to connect him with Union Oil's wells in nearby Adams Canyon. In 1894 the structure was lifted by pulley's to permit a basement to be built. The home and a portion of the original ranch remain in the Hardison Family. The style is Victorian Era Farmhouse.

**Wallace Libbey Hardison**

---

A home stands in Santa Paula Canyon, on the western side of Ojai Road, that even the most casual traveller of this route is bound to note. It is a palatial two-story Victorian style home with a wide front porch and exhibiting all of the requisite period filigree. To the rear of the property stands an equally imposing barn topped with a cupola.

*The Oaks  
of Santa Paula*

*Before “the Oaks”*

This impressive home, at 1226 Ojai Road, was built in 1884 by an equally impressive individual, Wallace Libbey Hardison. Oilman, agricultural businessman, gold miner, and newspaper publisher Hardison’s influence on the development of Santa Paula was so profound that any effort to comprehensively describe his importance to Santa Paula is bound to omit important details.

In fact the town of Santa Paula might well have been dubbed “Hardisonville,” if only to account for the remarkable numbers of this clan who made their homes in the town. But even if such a naming had occurred, it would still underrate the singular contributions made by this one member of the family to the success of the

community. At a time when Santa Paula’s future was far from secure, it was Hardison who provided the key ingredients. These were, in equal parts, money, imagination, and determination.

Wallace Hardison was born in 1850 in Caribou, Maine, the youngest of eight children of Ivory and Dorcas Abbott Hardison. He first ventured to California at the age of nineteen, working briefly in the lumber business in the wilds of Humboldt County. Quickly realizing that the real money was not to be made in California timber, the still youthful Wallace Hardison returned East in 1870 to join his brothers James and Harvey in mining for black gold in the booming oil fields in and around Bradford, Pennsylvania. A canny businessman from the start, he made his first oil fortune in remarkably short order.

In 1875 W.L. Hardison married Clara McDonald, the sister of Annie McDonald Say. Annie and her husband John R.D. Say were destined to become both business partners and neighbors of the Hardisons in Santa Paula. Wallace and Clara had two children in Pennsylvania, Guy Lyman, born in 1876, and Augusta in 1880. A second son, Warren, did not survive beyond his youth.

By 1880, the young man with the hard-charging personality and a seemingly unflinching instinct for commerce had invested in a ten thousand acre stock farm in Saline

County, Kansas. For good measure, he also capitalized a bank in Salina, the county seat. He had also become sufficiently established to be elected as Bradford's representative to the Pennsylvania Legislature. At a mere thirty years of age, Hardison's exceptional talents had already made him a man of substantial means and influence.

In Pennsylvania, Wallace Hardison cultivated a close business relationship with Lyman Stewart, one of the deans of Pennsylvania oil, and an important player in the oil leasing business. Stewart had suffered financial reversals, as oilmen often did, and it was Hardison, then on his way up in the world of oil, who staked his recovery.

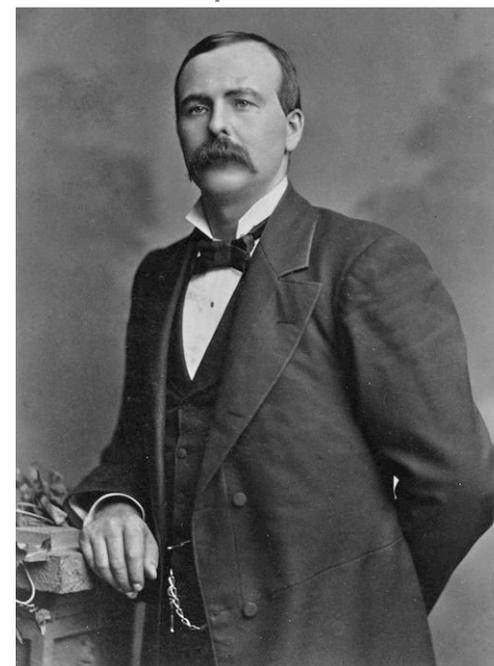

At the same time the two men were growing disenchanted with the state of affairs in the Pennsylvania oil fields, increasingly dominated by John D. Rockefeller. His Standard Oil Company exerted oppressive monopolistic control over pipelines and the railroads, and a hegemony over the levers of political power in Pennsylvania. Standard was in the process of systematically driving independent producers like Hardison and Stewart out of the Pennsylvania fields.

### *California, or Bust*

In an effort to wriggle out from under Rockefeller's heavy thumb, Hardison and Stewart hatched a plan to investigate production in the relatively wide-open California market. Stewart shipped two drilling rigs to California in December 1882, following them to Ventura County himself in April of the next year. With the preliminary arrangements for leasing land for drilling underway, he wired for Hardison to join him. Along with Thomas Bard and other Ventura County notables, Hardison and Stewart began purchasing oil leases that formed the basis of the Sespe Oil Company. The company imported experienced drilling crews from Pennsylvania to run their rigs.

California would not yield its petroleum wealth as quickly as they had hoped. Their first seven wells were dry holes. Expenses began to mount precipitously, climbing to nearly \$200,000,

with nothing to show for it but debt. On the verge of abandoning their efforts, Hardison and Stewart made one last plea for a loan from a Los Angeles banker, who reluctantly, but remarkably, agreed to advance them an additional \$10,000 line of credit. The liquidity gave them one more chance. On their eighth try, the partners struck oil. The visiting Pennsylvania oilmen had become permanent Californians, and on their way toward becoming wealthy ones in the bargain.

Hardison was followed to Santa Paula by his wife and children in July 1883. Their new home on Ojai Road was completed in 1884, and like their oil crews and equipment, its architect was an import from Pennsylvania.

Clara’s parents, William Benjamin Harrison and Elizabeth McDonald, joined their daughter and son-in-law in Santa Paula, buying a property just north of their home, today addressed as **1310 Ojai Road**. It has been

suggested that this home, also built during the 1880s, was occupied by Wallace and Clara prior to the completion of their family home, but firm evidence is lacking.

In 1885 the Sespe Oil Company was combined with the Mission Transfer Company to become the Hardison and Stewart Oil Company. Continually expanding their efforts, the following year they organized the Torrey Canyon Oil Company to explore development in the Piru area. The most momentous change to the organization of Hardison and Stewart’s business interests came in 1890, when all of their oil development efforts were combined under the flag of the Union Oil Company, forming the nucleus of an enterprise that would grow into one of the world’s largest oil companies. The incorporation papers for the company were signed on the second floor of the building in Santa Paula, which today houses the California Oil Museum. The company operated an oil refinery in Santa Paula, one of the state’s first.

Wallace Hardison’s preoccupations continued to expand beyond the riches that could be extracted from below the soil to those that could be found above ground. In 1883,

the year he first set foot in Santa Paula, Hardison purchased 6,400 acres of Rancho Ex-Mission San Buenaventura encompassing the hillsides and mountain ranges defining the entire northern boundary of the Santa Clara River Valley from Santa Paula to Saticoy. Two years later, when his in-laws John R.D. and Annie Say arrived, they formed the Santa Paula Horse and Cattle Company to manage the running of livestock on these vast lands.

The Hardison commercial empire was by then quite literally strung out across the entire nation, with Santa Paula as its new headquarters. Numerous members of both W.L.'s immediate and more distant family followed him to Santa Paula. One of the first to make the journey was his older brother Harvey, who quickly became Hardison's right-hand man in the California oilfields.

An astonishing willingness to take risks was a constant feature of Hardison's career. One of his more conspicuous throws of the dice came when the Mission Transfer Company ordered the construction of an oil tanker, the eponymous *W.L. Hardison*. With a capacity of 1.6 million gallons, the ship was built for hauling oil between the

wharf in Ventura and the company's refinery on San Francisco Bay—the first of its kind to ply the West Coast. When launched in January 1889, the ship represented an investment of nearly \$100,000, a huge gamble at a time when the technologies for shipping petroleum products by sea were new and unproven.

This was one wager that did not pay off for Hardison and company. Only six months after its launch, the *W.L. Hardison* caught fire while being loaded with crude oil and gasoline at Ventura. Over the next few hours, a series of spectacular explosions rattled every window in town, as the *W.L. Hardison* went down in flames, nearly taking the wharf along with it. The loss was only partially insured, but characteristically, Wallace Hardison pressed on undaunted.

A second calamity struck less than a year later, this time even closer to home. Hardison's company was exploring for oil in Adams Canyon, west of Santa Paula, by means of a tunnel blasted horizontally into the slopes of Sulphur Mountain. On the morning of April 5, 1890, two workers setting off a charge in the tunnel ignited a gas

explosion of such ferocity that timbers were blown out of the tunnel’s mouth. The workers inside the mine were severely burned, but dragged from the tunnel alive. Wallace Hardison, his brother Harvey, and Santa Paula’s pioneer physician Dr. David W. Mott quickly arrived on the scene.

Later that afternoon, Harvey Hardison and three employees reentered the mine to inspect the damage and repair the tunnel’s lighting system. Hardison and two of the workers were seven hundred feet into the shaft when another blast ripped the mine, this time causing a cave-in. For the rest of the day and into the night, a furious rescue effort ensued in the gaseous blackness of the tunnel, assisted by hundreds of volunteer workers from Santa Paula who had rushed to the scene of the disaster when word reached town.

It was a heroic undertaking, supervised by a despondent Wallace Hardison, but in the end, to no avail. Harvey Hardison and his two companions had perished deep within the mine. The blow was a heavy one. Wallace had lost not only a brother but an experienced oilman and

business partner. He would be impossible to replace, in either W.L.’s personal or business life.

### *Universalism and the Pasadena Connection*

Commerce was by no means Hardison’s only enthusiasm. A devoted Universalist dating back to his upbringing in Maine, W.L. applied his characteristic resolve to the formation of a Universalist congregation in Santa Paula. During the 1880s, the closest Universalist church to Santa Paula was in Pasadena, a congregation Hardison joined with an eye toward using the association to establish a Santa Paula branch. With Hardison’s leadership, the Santa Paula congregation was founded in 1889. He also served as the first parish president. George Sewell, Charles McKeveatt, Dr. David W. Mott and other prominent citizens were cofounders.

In Pasadena W.L. befriended Amos Throop, a member of the Universalist congregation. A wealthy retired businessman and politician from Chicago, Throop was most well-known in Pasadena for launching the Throop Institute, the vocational and manual arts school that evolved

into today's Caltech. When it came time to build a Universalist church in Santa Paula, Hardison's association with Throop paid dividends. Throop responded in a substantial way to the call for contributors, just as Wallace Hardison did himself. When the Santa Paula church was completed in 1892, several of the stained-glass windows were dedicated to members of the Hardison family, including one to his late brother Harvey. Continuing his amiable relationship with Throop, Hardison served on the first board of directors of the Throop Institute. Completing the circle, Wallace's son Guy later became a student at Throop.

### *The Blanchard Partnership*

The unexpected death in 1880 of Elisha Bradley, Nathan Blanchard's monied business partner, propelled Blanchard's Santa Paula investments toward potential ruin. For the following five years the breakup of the partnership resulting from Bradley's demise left the town's water system in the ownership of Mary Bradley, E.L. Bradley's widow in San Jose. When she died in 1885, Santa Paula's lifeline was sold out of her estate as so much chattel.

The unhappy situation for the town was, at the time, no Santa Paulan was in a position to buy the water company. Even Wallace Hardison, invested heavily as he was in mostly unproven Ventura County oil fields, was unable to raise sufficient capital to return this critical asset to local hands. It seemed the title to Santa Paula Canyon's water rights, including the water company's system of ditches and flumes, was destined to fall into the ownership of individuals with little direct interest in the town's future, an intolerable prospect for a growing Western town.

Wallace Hardison's business connections positioned him to broker an interim solution. Even if he could not bankroll the purchase of the water system, Hardison possessed the unique capacity to locate affluent outsiders in whom the town could entrust its temporary ownership. Tapping into his network of associates in Pennsylvania, he found such a person in John C. Lineman, general manager of the Ohio Oil Company. Lineman bought the entire water system, pipes, flumes, flour mill and all, from the Bradley estate in 1886. In the same transaction, Charles H. McKevevtt purchased a tract of Bradley land comprising much of the northern part of the town. Lineman

held title for a year, before passing it along to another Pennsylvania oilman, William H. Bradley. (The last name is probably a coincidence — he was apparently unrelated to Blanchard’s deceased partner.)

Still, local money was desperately needed if the town was to reclaim full control of its destiny. Only a year after the formation of Union Oil, Wallace Hardison and his rapidly expanding fortune made the critical difference. He subscribed as the majority stockholder in the newly-formed Santa Paula Water Works, Ltd., which took over the Santa Paula Creek water rights owned by W.H. Bradley, and became the supplier of domestic water to the town. At the same time, Hardison and others formed the Thermal Belt Water Company to supply water for irrigation. The essential pieces of the puzzle forming the basis of a prosperous agricultural community had been assembled, due in no small part to Wallace Hardison.

The importance of the Thermal Belt Water Company can hardly be overstated. The company constructed a pipeline along the foothills of Santa Paula to convey Santa Paula Creek water from the hillside above the mill to the

uplands west of town, enabling the planting of citrus in this area on a larger scale than anyone could previously have imagined. The first to harness this potential was the Limoneira Company, formed by Nathan Blanchard and Wallace Hardison on four hundred acres of land on Foothill Road in 1893. Over the next three decades of phenomenal growth and expansion, Limoneira became the principal driver of Santa Paula’s economic prosperity. Once again, W.L. Hardison occupied the role of one of Santa Paula’s prime movers and genuine visionaries.

Wallace Hardison’s ever-expanding California oil and citrus empire proved to be an irresistible magnet for his kin. Of the five sons of his elder brother Jacob who lived beyond childhood, all but one eventually made their way to Ventura County. Two quickly became ensconced in their uncle’s businesses. The first of Jacob Hardison’s sons to arrive in Santa Paula was Lowell. Already a seasoned oilman with experience in the fields of Pennsylvania, he arrived in 1883, the same year as his uncle. Allan Crosby “A.C.” Hardison turned up after completing his degree in Civil Engineering at the University of Maine in 1890. Only a few years later, he became one of the found-

ing stockholders in the Limoneira Company. Waldo Hardison took up ranching in the Sespe area on land he co-owned with his brother Allan. The last to arrive was Haines, who in 1912 also settled into ranching in the Fillmore area.

By the turn of the century, Santa Paula was fairly awash with Hardison family members and their descendants. During the 1880s another of Wallace's siblings, his widowed sister Ida Brown, moved from Maine to Santa Paula. She built a home at the southwestern corner of Olive and Santa Barbara streets, where she raised two sons, Chester and Fred. When Wallace began his Peruvian gold mining adventure a decade later, Chester Brown accompanied him on the long journey to South America.

Also joining Wallace in the oil business in 1883 was his nephew Lewis, the son of his brother Oliver, via the well-worn path beaten by the family through the Pennsylvania oilfields. Lewis, who built a home on 8th Street, became a founding member of the city's Board of Trustees in 1902, and Santa Paula's first mayor.

Any recounting of Wallace Hardison's relatives who were drawn to Santa Paula by his many enterprises cannot fail to mention Wallace's great-nephew, Charles Collins Teague. Coming West on Hardison's suggestion in 1893, Teague started as an employee of the Limoneira Company, advancing quickly to appointment as the company's director, a position he held for a remarkable fifty year period. During his lifetime Teague became not only one of the preeminent figures in California agribusiness, but also an individual with influence reaching into every corner of Santa Paula's social life, economy and politics.

The 1880s had been a decade of astonishing accomplishments for Wallace Hardison, but the 1890s would prove no less so for the dynamic businessman. Unceasingly in search of new opportunities, he continued to expand his oil interests, buying leases and forming subsidiary companies to explore fields in Orange, Fresno and Kern counties in California, as well as in Mexico and Peru. The Peruvian episode would prove to be easily the most exotic, daring, and physically challenging adventure of his life.

*Over the Great Divide*

In the course of investigating oil prospects in South America in 1894, Hardison was shown samples of gold said to have been extracted from a mine located high in the Andes Mountains of southern Peru, near the border with Bolivia. Taking a keen interest in the opportunity, Hardison and his nephew Chester Brown set off on the almost impossible trek from the port of Mollendo, Peru to the mine site, traversing hundreds of miles of dangerous cliffside trails, wading across rivers, and finally crossing the great divide of the Andes. When they arrived at the supposed source of the gold ore, the mine they found was poorly developed, a great disappointment. The perilous journey might have been written off as utterly futile, had Hardison and Brown not spent a previous night camping at a much more promising operation called Santo Domingo.

The men returned to Santo Domingo, and after some negotiations, Hardison agreed to pay the owners \$210,000 for the mine, leaving \$10,000 in cash as a deposit. Once back home, he formed a mining company

with the backing of some of his old Pennsylvania associates. All of Hardison's credibility as a businessman must have been put to the test in persuading his partners to invest in such a precarious scheme so far from home and sight unseen.

The money fully raised, Hardison and five others returned to Santo Domingo only to find the mine owners reneging on the sale, after discovering a rich new gold deposit in the interval. The method of persuasion required to renew the contract reportedly involved Hardison shooting the head off of a rooster with his revolver, a method of negotiation he is not recorded as having employed at any other time, before or after.

The Santo Domingo mine became productive but not without a tremendous investment in infrastructure, including the construction of previously non-existent roads to the remote area. Hardison made at least two trips to Peru over the next few years, but at most other times left the supervision of the mine to his nephews, Chester Brown and A.C. Hardison. The latter spent the better part of two years at the mine with his wife and children,

long enough for their second son, Ernest “Domingo” Hardison, to be born there. Two of Brown’s children were also born in Peru.

It can be easily imagined that all of this travel was weighing heavily on Wallace’s domestic life with Clara, who apparently did not accompany her husband on his numerous business journeys. Their second daughter, Hope, was born in Santa Paula in 1889, but this would be their last child together. The reasons for the decay of their marriage can only be surmised, but in addition to his frequent absences from the household, another point of friction may have been a disparity of faiths. Wallace was an enthusiastic Universalist, and Clara a devout Presbyterian—a difference of no small importance at the time.

No matter the causes, they were divorced in 1900. In the wake of his separation from Clara, Hardison relocated to Los Angeles, renewed his association with the Pasadena Universalist Church, and brought his son Guy into his businesses. By the beginning of the new century Hardison had settled into the life of the self-made man, a proven world-beater, an echelon populated by only a se-

lect few. But the peripatetic Wallace Hardison could never remain motionless for long.

### *The Immovable Object*

Having piled success upon success, it must have seemed that losing was an impossibility. In 1900 Wallace Hardison bought one of the most venerable newspapers in Los Angeles, the *Herald*; in the same year, he became the first president of the Southern California Oil Exchange. He immediately began reshaping the newspaper as a muscu-

*The Hardison House on Ojai Road probably around 1905, with daughter Hope and first wife Clara on the front porch. Not long after this photo was taken, Clara had the entire home lifted two feet higher to accommodate a full basement and a central heating system. (Procter Family)*

lar advocate for the interests of the petroleum industry, which necessitated a change in the newspaper's political alignment from Democratic to Republican. It was a fateful decision. Los Angeles already had a Republican newspaper the *Los Angeles Times*, owned by the city's acknowledged king-maker, the immensely powerful Gen. Harrison Gray Otis. The irresistible force represented by Wallace Hardison had finally met with an immovable object, in the person of Otis. This time, Hardison had joined in a match that he could not, and would not, win.

A veteran of both the Civil and Spanish American wars, Harrison Gray Otis understood battle as well as any man alive. By this time, his ferocity in commercial and political conflict, most famously illustrated by his war against labor unions, was approaching the legendary. His absolute determination to defeat a foe was no less in this case. Otis unleashed every bit of his fury against the upstart Hardison and the *Herald*. No detail, no matter how personal, would escape his wrathful attention. Among other scourges, the *Times* accused Hardison of fraudulently inflating the *Herald's* circulation numbers and of floating bogus oil company stock. Hardison's monetary and emo-

tional resources were severely tested under the withering barrage, and began to come up short.

Taking a perverse pleasure in Hardison's growing financial woes, the *Times* routinely referred to him derisively as "Hardupson," and his son Guy, by then the newspaper's vice president, as "Hadason." Even Hardison's announced intentions in 1903 to remarry, to Mary Belle Daily, an operatic singer from Salina, Kansas with a national reputation, was held up for public ridicule by Otis. The *Times* openly insinuated that Daily might not have agreed to wed Hardison if she had known that he was no longer a wealthy man.

This insult was too much for Wallace Hardison. On March 7, 1903, the day after the story ran, Hardison and his managing editor R.H. Hay Chapman demanded a meeting with Otis. They were told by his office that Otis was at the Los Angeles Theater attending a performance of "The Heart of Maryland," and would not interrupt his enjoyment of the program to speak with them. The pair made their way to the theater to confront Otis. A scuffle ensued, which the *Times* naturally portrayed in print the

following day as “cowardly” and “premeditated” on Hardison’s part, and otherwise set the event in a light entirely favorable to Otis. Wallace Hardison was arrested, but Otis, feigning uncharacteristic magnanimity, declined to press charges.

As Hardison’s financial crisis deepened, Otis took particular glee in recounting the legal actions taken against him in the pages of the *Times*. Among Hardison’s many investors in the *Herald* calling in their debts was fellow oilman Edward L. Doheny. In an effort to raise funds, Hardison was forced to liquidate a number of his investments, including the Raymond Improvement Company, which he had formed to develop the exclusive tract of homes in Pasadena known as Raymond Hill.

It was not enough. In June 1904 Wallace Hardison, the once indefatigable titan of numerous industries, was forced to sell the *Herald* at a huge loss to a group of investors, and the paper’s politics returned to Democratic. The misbegotten *Herald* adventure had consumed as much as ninety percent of his fortune. Ironically, much of Hardison’s Santa Paula holdings were shielded from his

losses on the *Herald*, having been settled on Clara and their children in the divorce.

If Hardison’s encounter with Harrison Gray Otis reduced his enthusiasm for life and business, it did not show. After the sale of the *Herald* and his marriage to Mary Belle Daily, Hardison purchased the Gen. George Stoneman Adobe in South Pasadena, taking great pleasure in restoring the historic old home and extensive grounds. Mary Belle continued her singing career locally, and Wallace gradually regained his footing and began applying himself once again to the business he understood so well, citrus ranching.

Hardison’s financial recovery came to an abrupt end on April 10, 1909. Driving his car from his ranch to collect supplies in San Fernando, Hardison approached a blind Southern Pacific grade crossing at Roscoe in the San Fernando Valley. There, an unscheduled locomotive broadsided his car, killing him instantly. He was just short of fifty-nine years old. Santa Paula residents were deeply shocked by the loss. Even his implacable foe, Harrison Gray Otis, was respectful in his coverage of the

tragic death of his former nemesis. Mary Belle Hardison sent his ashes to Maine, to be interred next to his mother in Caribou.

In Santa Paula, Clara’s mother Elizabeth McDonald had died in 1905 and her father William the following year, leading to the sale of their home and ranch to Alvin Shelley Bond and Lavinia Ward Bond. The Bonds enlarged and modernized the old house at 1310 Ojai Road, transforming it into what would then have been a more fashionable California Bungalow-style residence. The Bonds owned the property until the death of Lavinia Bond in 1943.

The McDonald property may have fallen out of the family fold, and also been altered, but the Hardison home would not suffer a similar fate. After the death of his father, Guy Hardison returned to Santa Paula to live in the Ojai Road home. He also owned a ranch near Sycamore Road, between Santa Paula and Fillmore, and lived for a time in Berkeley. An important local figure in his own right, Guy Hardison served on the Santa Paula City Council during the 1930s and 1940s, including terms as

mayor. A few years after Clara Hardison died in 1940, Guy returned to Los Angeles, where he lived until his death in 1961. He and his wife Zetta Nordyke, whom he’d married in 1898, had one daughter, Elizabeth. The older Hardison daughter, Augusta, married Allen Lemmon and moved to Northern California. They had four children.

The youngest of the Hardison children, Hope, married walnut rancher James Norris Procter of Saticoy in 1912. After living for the first several years of their marriage in his home in Saticoy, in 1919 the couple moved to the Hardison family home, where they remained for the rest of their lives. They raised their two children, Edwin Norris, born in 1916, and Robert, born in 1921 on Ojai Road.

The brothers became the third generation of the Hardison family to live in the home, which remains to this day in the ownership of the Procter family. So in more ways than one this house represents a direct lineage back to Wallace L. Hardison, an essential figure in local history and without question one of California’s most remarkable individuals.
